Parenting Tip - Adults have experienced the growth and ultimate explosion of the internet/social media world, but for children it is the world in which they have grown. While it contributes to learning, we cannot be oblivious to its real dangers. Experts agree that most children have their first view of pornography between the ages of 8 and 11 yrs. of age; they usually stumble on it by accident on the internet. It is recommended that, in order to protect them, children under the age of 16 should not have unsupervised access to the internet - this includes on any computer, tablet, phone, TV, or gaming system. Being naïve about what your children are seeing will hurt them, so protect them. Talk about what is good and what is not and why. Give them the tools they need so that they will not be negatively impacted by the media world.
